

GreenBrowser is an alternative web based browser for Windows Designer on the Web.

It is a standalone application and does not require any installation.

Open the Whiteline Web Portal zip file.

Copy the Greenbrowser folder to any location, we suggest my Documents.

Copy the Whiteline Portal shortcut to your desktop by right clicking and select copy from dropdown.

This will open up a single page with a number of site options. Click on the top left image

(named Window Designer on the Web) to open. You are ready to start.

The Window Designer on the Web page should open. If you want to go back to the Home page (as above) simply click on the X (red circle) to close the current website page.
