

GT STAY-GUARD ELITE

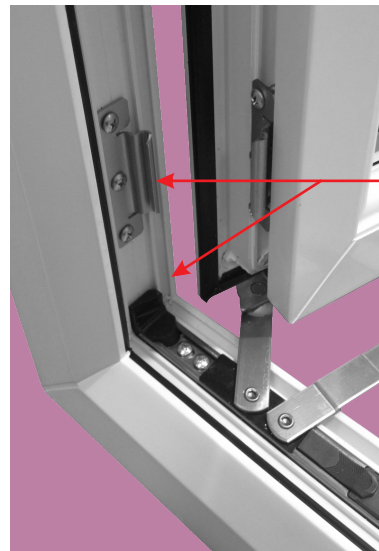

GT STAY-GUARD ELITE is a simple, easy and effective method of enhancing security for windows.

The unique engineered shape and design of Stay Guard Elite goes beyond meeting the industry's most demanding security standards.

This a hinge protection device which, when fitted in conjunction with a friction stay, will assist in meeting the requirements of BS7950. To obtain the best performance Stay-Guard Elite should be secured into reinforcement.

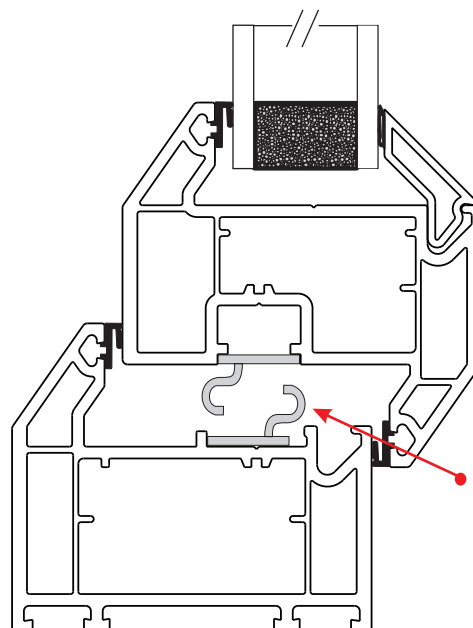

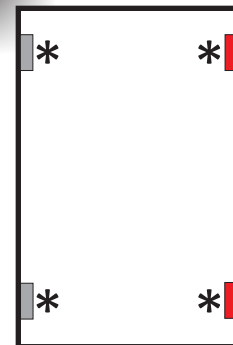

This product has been manufactured from high tensile steel that is five times stronger than most standard hinge protection devices.

They are available in 17mm (SG036) and 13mm (SG035) standard stack heights.

Fit Stay Guard Elite approx 75mm centres from the internal corner as show here.

Fit run up blocks  on opposite side to the Stay Guard Elite and pack the unit at the same positions marked * to stop sash movement.

STAY GUARD ELITE SG036 on outer frame and sash for all types of stays to include Egress/Easy Clean

All drawings are not to scale
