### PlatinumNRG Sculptured

## OPTIONAL AVAILABLE FINISHES

Platinum  
**NRG**

Our PVCu doors are manufactured to the very highest standards using environmentally-friendly lead-free PVCu from one of the world's leading extruders.

The standard colour is white although various woodgrains or any Renolit® foil colours are available on request. Our white profile undergoes a unique polishing process that provides a more sustainable easy clean surface than most other PVCu doors.

**WEATHERSEAL**

Dual weatherseal for extra protection against the elements.

**LOCKING SYSTEM**

Special hook bolt for high level security.

**HINGES**

Dedicated PVCu door hinges for enhanced security.

**HANDLE**

Stylish handle sets to suit both front and back doors.

Optional thermally broken aluminium low threshold for ease of access.

Eco-friendly PVCu profile uses calcium-based stabilisers rather than the lead that most manufacturers use.

4:20:4 sealed unit glazing with a range of energy efficient and decorative glass options.

Low-line glazing bead with low-profile black gaskets for improved security and greater sightlines.

In our ongoing quest to provide the highest quality products for our customers, our designs and specifications are subject to change without notice.
