ALUMINA BI-FOLD DOORS

SUPREME STRENGTH

Our Whiteline Alumina aluminium bi-folding door offers supreme strength and high security, with panes spanning up to 1.2m wide and 2.5m high.

THERMAL EFFICIENCY

Our Alumina bi-folding door offers industry leading thermal efficiency with U-values as low as 1.2.

FOIL FINISH

Amazingly flexible and versatile, Alumina is available in a wide range of foiled finishes to perfectly complement any home.

PEACE OF MIND

Whiteline Alumina bi-folding doors include high level security features such as shootbolts, anti-lift features, anti-bump cylinders and optional anti-snap cylinders.

FULLY ACCREDITED

Tested to PAS24, our Alumina bi-folding door has also achieved Secured by Design accreditation.

THE FIRST THERMALLY EFFICIENT ALUMINIUM BI-FOLD TO MATCH A PVC-U SYSTEM

Our Whiteline Alumina Bi-folding door breaks new ground with supreme strength, high level security, low U values, sculptured lines and an optional warm touch foiled exterior.

It's clear to see from the Alumina bifolding door that whilst it's an aluminium bifold it has a strong PVCu influence. The door features typical PVCu aesthetics that are a complete departure from any other type of aluminium bifold. Alumina is fully sculptured like many PVCu windows and doors which is what makes it a perfect match for any existing PVCu installation.

As well as a combined lock and thermal insert, our Alumina bi-folding door features a high-strength engineering polymer lock body. This means the lock itself acts as a thermal break, boosting the door's thermal performance compared to a traditional aluminium door. Alumina offers true U values as low as 1.2W/m²k, thanks to the thermal lock and 40mm triple glazed unit.

Whiteline Alumina is available in pretty much any powdercoated colour, as well as a woodgrain or flat foiled finish – perfectly matching our range of windows and doors.

GLAZING OPTIONS

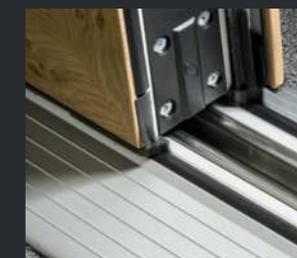

28mm double glazed and 36mm or 40mm triple glazed options available

PART M COMPLIANT

Designed for easy living, the Whiteline Alumina bi-folding door is available with 3 threshold options, including a Part M compliant low threshold measuring just 23.5mm high.

10 YEAR GUARANTEE

Alumina foiled finishes come with a Whiteline 10-year guarantee for that extra assurance and peace of mind

COMBINED LOCK AND THERMAL INSERT
